VALENTINE DIGITAL

Inside

**Michael, diagnosed with Nephrotic Syndrome**

Michael is a 13 year old boy who was diagnosed with Nephrotic Syndrome in 1997 when he was 7 years old. He became tired, dependent and was on prednisone everyday or every other day, until September 1998. At that time, he went on cyclosporine and it did wonders - less frequent recurrences, he stayed on cyclosporine on and off until March 2006. He was happy to say that since then, he's been on steroids twice the last time in February 2007. He has always maintained a very active and normal childhood. He's been playing football, basketball, and basketball which he was six years old.

Join us at *Countdown To A Cure*  
honoring distinguished individuals for their involvement in achieving a Mission Possible, providing hope to thousands of patients affected by the debilitating kidney conditions, Nephrotic Syndrome and Focal Segmental Glomerulosclerosis (FSGS)

Proceeds will benefit The NephCure Foundation to support research seeking the cause for Nephrotic Syndrome and FSGS, improve treatment and find a cure. NephCure is a national 501(c)(3) organization that provides information, education, support and advocacy for patients and families.

**KIDNEY DISEASES**  
NEPHROTIC SYNDROME & FSGS: Nephrotic Syndrome occurs when the filtering units of the kidneys are not functioning properly allowing protein to escape the body. FSGS is the name given to the serious scarring of the kidneys that can result due to this syndrome.
